### Mission Statement Research Committee

The ISBI Research Committee is invested in the advancement of burns research for health professionals, patients, families and the wider community in the prevention, treatment, and rehabilitation of those impacted by a burn injury. The committee aims to facilitate members to disseminate multidisciplinary research findings and ideas that encourage mutual and collaborative relationships globally.

### Current projects

The role of multiplatform messaging applications in burns care and rehabilitation: A systematic review.  
Registered with PROSPERO International prospective register of systematic reviews
